Remove System Restore Point

0-WEB.ru

This rogue displays false alerts that are designed to make you think that your computer has hard disk problems that have lead to corrupt and missing data.

- 1. remove system restore points windows 10
- 2. remove system restore points windows xp
- 3. remove system restore points win7

Once installed, System Restore will displayfalse error messages and security warnings on the infected computer. In reality, though, there is nothing wrong with your hardware or data, so these error messages should be ignored.. These messageswill state that there is something wrong with your computer's hard drive andthen suggests that you download and install a program that can fix the problem.. System Restore is installed through hacked sites that exploit vulnerabilities in software that may be installed on your computer or through fake online scanner pages.. When you click on of these alerts, System Restore will automatically be started.
